## Career Objective

---

A Graduate software developer with experience in full stack web development and Desktop Support. Having the fundamental knowledge and also the social skills I got throughout my degree sets me apart. My career goal is to secure a Desktop Support Engineer position in addition to extend my learning curve in networking and cloud environment.

## Employment History

---

March 2021  
WordPress Web developer  
Perth digital agency  
Midland, WA

- WordPress website design and development using Explorer and Inspiro theme.
- Identify bugs and document them in bug herd.
- Regular maintenance of client's websites.

February 2020 - August 2020  
Desktop Support Engineer  
TasIT, Hobart, TAS

- Install, upgrade, support and troubleshoot Windows OS and Microsoft office suite, authorize desktop applications, hardware, and peripheral equipments.
- Assisted end users in using new and existing technology, provided coaching on one-on-one technology.
- Performed remedial repairs on computers, laptops, printers, and any other authorized peripheral equipment.
- Setting up active directory domain controller for managing user accounts and computers on the network, join and bind client system to the domain controller.

## Projects

---

Sports-CMS (Content Management System, February 2019 – October 2019)

### *Key Tasks:*

- I have developed a commercial content management system (CMS) that analyses sports rating for commercial use using LAMP (Linux, Apache, MySQL, and object-oriented PHP) stack. This was developed using agile methodology.
- I have contributed to prepare Requirement Trace Matrix (RTM) in compliance with Requirement Document in three iterative agile cycle.
- I have prepared and executed Test cases for user and technical testing and performed them. The live is <https://petermanratings.com/>

*Key Tasks:*

- I have designed and developed a desktop application from Requirement Trace Matrix (RTM) and requirement documents that will help students to enrol in the in-semester units by giving information about university staff members and courses.
- The application was designed using MVC (Model View Controller) framework.
